

## ROD SEAL INSTALL TOOL

- ✓ NEW TOOL THAT HELPS YOU IN THE INSTALLATION OF ALL KINDS OF ROD SEALS JUST IN SECONDS.
- ✓ IT DOESN'T DAMAGE THE SEALS BEING A MUST HAVE TOOL FOR A PERFECT INSTALLATION OF ANY KIND OF ROD SEAL
- ✓ THIS NEW DESIGN ALLOWS TO INTRODUCE THE SEAL IN HOUSINGS LOCATED UP TO 100 MM FAR

## EFFICIENT & UNIVERSAL

This new tool allows you to install any kind or rod seal into hard to access housings, due that it gives the seal the optimum shape to be introduced, and later handled to be correctly installed, thanks to the tool's depth, being able to introduce the seal into housings up to 100 mm deeper, that's up to twice bigger than other existing tools.

Thanks to its main axe, it allows the install of any kind of rod seal without any damage. You should only choose

your install tool from any of available sizes.

Thanks to its robust design and construction, there is no risk to loose any part of the tools.

Easy-to-use. You'll be ready to install any kind of rod seal in just 2 steps to be installed correctly, without any damage into any housing.

SEAL STYLE	AVAILABLE SIZES		
	UTIL 020	UTIL 035	UTIL 050
Sizes range/section (in inches)	0.75-1.375 0.187"	1.375-2" 0.375"	2-3.125" 0.500"
P.T.F.E. composite seal			
Due its construction, allows you the installation of this kind of seal, in some sizes. It is advisable the installation of composite seals with this tool. This takes more importance in small sizes in order to avoid the stress given to the seal while installing.			
V-Packing			
Due its construction, V-Packings can be hard to install. This takes more importance in compact ones, style AM. V-Rings can be easilly damaged during install due to its small section. In this case, it is advisable to be installed using an install tool.			
U-Lip seal			
The most typical use of this tool are U-lip seals. This tool can be used also with compact seal and spring energised U-Seal. All this makes the tool a must-have when installing any kind of seals.			

On orders greater than 150 units, we can personalize the complete set of install tools on handles
